FMST TOOLS (FMST):

Fluid Motion Soft Tissue Tools

FMST tools are the soft tissue mobilization tools that can take myo-fascial manipulation and mobilization to the next level in your practice. The design of the two tools enables the trainer to work over all surfaces of the body quickly and easily. The FMST tools allow practitioners to reduce scar tissue problems from old injuries and surgeries, improve pain control results and improve muscle flexibility in their patients.

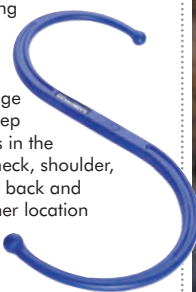

F1 shown

F2 shown

THE ORIGINAL BACKNOBBER II®

is used by hooking one of its curves over a shoulder or under an arm and using leverage to apply firm, deep pressure to knots in the muscles of the neck, shoulder, upper and lower back and to nearly any other location where muscle soreness may occur.

THE ORIGINAL TIGER TAIL®

Make your muscles happy! The Tiger Tail Rolling Muscle Massager, 18" or 22" is a dense foam covered, muscle-friendly self care massage tool that helps you apply rolling and compression massage techniques.

(E9011-B) DOC CERVICAL & SPINAL TRACTION TABLE:

The unique design of the DOC table utilizes a state-of-the-art digital command center for specific vertebral targeting, separate lumbar and cervical traction programming and continuous readout and graphing of treatment protocols. In addition, the digital command center also controls table elevation and rear lateral flexion, all at the push of a button.

DOC TABLES FEATURES:

- Axial Rotation and Lateral Flexion
- Digital Command Center which includes:
 - Specific vertebral targeting
 - Separate lumbar and cervical traction/decompression programming
 - Continuous readout and graphing of treatment parameters
 - Interactive color display
- Lifting Capacity: 350 lbs
- Pre-programmed lumbar and cervical decompression protocols
- Cervical capture headpiece
- Customizable treatment protocols
- Traction belting system can enhance restraint for optimal decompression.
- Reference library - including patient setup and training materials
- User-defined treatment hold and relax times
- Speed Control
- Expanded customizable protocols
- Real-time digital treatment tracking
- Table Elevation
